

# Daily Population Statistics Analysis

## Single-Facility Analysis

2025-09-12

### Data Summary

Total days recorded: 1713

Simulation period: Day 3651 to Day 5363

Mean total population: 95.9

Mean colonized patients: 34.13

Mean detected patients: 20.36

Mean isolated patients: 21.21

### Descriptive Statistics

#### Population Statistics Summary

Table 1: Descriptive Statistics for Daily Population Counts

population	Mean	Median	SD	Min	Max
total	95.90	96	10.34	64	130
colonized	34.13	34	7.41	8	60
detected	20.36	20	5.10	4	39
isolated	21.21	22	5.26	6	42

### Correlation Analysis

Table 2: Correlation Matrix of Population Types

	Variable	total	colonized	detected	isolated
total	total	1.000	0.593	0.534	0.533
colonized	colonized	0.593	1.000	0.634	0.632
detected	detected	0.534	0.634	1.000	0.984
isolated	isolated	0.533	0.632	0.984	1.000

## Visualizations

### Distribution of Population Types
